Current Projects

Newport

Stockland Development

Located on the Redcliffe Peninsula, the Newport Development is our largest project to date. This unique waterside community is growing fast, with plenty of parks, greenspaces an eco corridor and a future 23 hectare lake . We have completed over 20 stages thus far and will continue to do so over the coming years. The Newport Development has some incredible custom features and we are proud as a company to have been involved with a project such as this.

Stone Ridge

Stockland Residential Development

Located North of Brisbane in the suburb of Narangba, the Stone Ridge Development is impressive to say the least. It boasts some excellent timber and stone features along with a very interactive playground built by Ace Landscapes. The Landscape Construction side of the project is now complete and Ace Maintenance continues to maintain the development to ensure it is kept looking immaculate.

Brookwater

Springfield City Group

Brookwater is located in the Greater Springfield development. Design is at the centre of Brookwater. Every slope, streetscape and sweeping bend has been thoughtfully considered to guarantee the high standards of this exclusive community. We are proud of the work that has already been completed and are looking forward to completing the following stages at the same high standard,

Health and Safety

Here at Ace, we start the day with a safety meeting each and every day. Keeping our employees, sub-contractors and those around us safe is our number one priority. We have various safety management systems in place to ensure we maintain a safe working environment.

Quality

We pride ourselves on our high standards for all aspects of our landscaping works. We source only the best products and all members of the team are dedicated to providing an exceptional quality of work and attention to detail.

Environment

We are dedicated to creating as little impact to the environment around us as possible. We are constantly searching for ways we can better our work processes, and have put an environmental management system in place to ensure this.
